

Lambda – Destinations

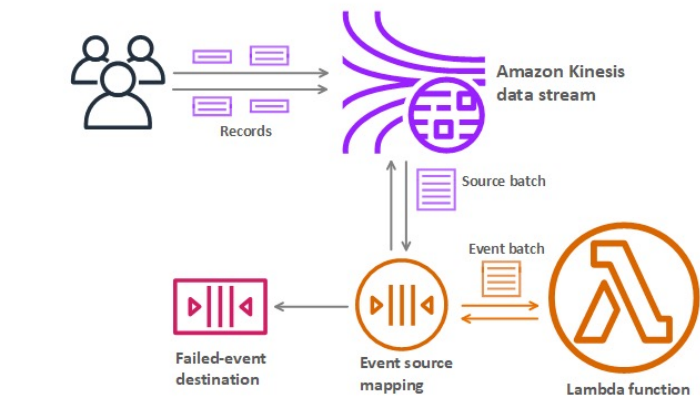

- Nov 2019: Can configure to send result to a destination
- **Asynchronous invocations** - can define destinations for successful and failed event:
 - Amazon SQS
 - Amazon SNS
 - AWS Lambda
 - Amazon EventBridge bus
- *Note: AWS recommends you use destinations instead of DLQ now (but both can be used at the same time)*
- **Event Source mapping:** for discarded event batches
 - Amazon SQS
 - Amazon SNS
- *Note: you can send events to a DLQ directly from SQS*

Destinations for Asynchronous Invocation
