

Lambda Function Configuration

- **RAM:**
 - From 128MB to 10GB in 64MB increments
 - The more RAM you add, the more vCPU credits you get
 - At 1,792 MB, a function has the equivalent of one full vCPU
 - After 1,792 MB, you get more than one CPU, and need to use multi-threading in your code to benefit from it (up to 6 vCPU)
- If your application is CPU-bound (computation heavy), increase RAM
- **Timeout:** default 3 seconds, maximum is 900 seconds (15 minutes)
