

Lambda Event Mapper Scaling

- **Kinesis Data Streams & DynamoDB Streams:**
 - One Lambda invocation per stream shard
 - If you use parallelization, up to 10 batches processed per shard simultaneously
- **SQS Standard:**
 - Lambda adds 60 more instances per minute to scale up
 - Up to 1000 batches of messages processed simultaneously
- **SQS FIFO:**
 - Messages with the same GroupID will be processed in order
 - The Lambda function scales to the number of active message groups
