

Lambda Concurrency and Throttling

- Concurrency limit: up to 1000 concurrent executions

- Can set a “**reserved concurrency**” at the function level (=limit)
- Each invocation over the concurrency limit will trigger a “Throttle”
- Throttle behavior:
 - If synchronous invocation => return ThrottleError - 429
 - If asynchronous invocation => retry automatically and then go to DLQ
- If you need a higher limit, open a support ticket
