Application: S3 Events to multiple queues

- For the same combination of: **event type** (e.g. object create) and **prefix** (e.g. images/) you can only have <u>one S3 Event rule</u>
- If you want to send the same S3 event to many SQS queues, use fan-out

SQS Queues

S3 Object created... → events → Amazon S3 → **SNS Topic** → Fan-out →

Lambda Function
