SQS FIFO – Message Grouping

- If you specify the same value of **MessageGroupID** in an SQS FIFO queue, you can only have one consumer, and all the messages are in order

- To get ordering at the level of a subset of messages, specify different values for **MessageGroupID**
  - Messages that share a common Message Group ID will be in order within the group
  - Each Group ID can have a different consumer (parallel processing!)
  - Ordering across groups is not guaranteed
